

BATTLE TABLE

-  Enhanced decision making informed by intuitive understanding of real 3D terrain across the battlefield or close quarter engagements.
-  View multiple overlays and even split unique views to each user for wargaming and training.
-  Commanders can provide a live 3D command briefing simultaneously to multiple locations without losing their situational awareness.
-  Interoperable with the Battle Wall, standard PC's and tablets to provide a connected environment in which to plan, rehearse and execute.
